JH/wh

Dear Dr. Lederberg,

It gives me great pleasure to announce that Elsevier/North Holland are launching a new journal entitled GENETIC ENGINEERING, which is scheduled to appear early in 1977 with Professor Waclaw Szybalski as Editor-in-Chief.

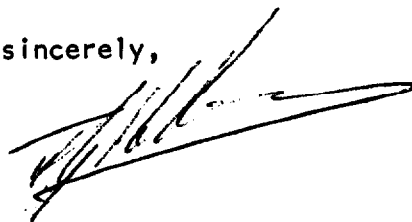

With the Editorial Board finalised and our promotional machinery moving into top gear, we are contacting recognised workers in the field of gene cloning and molecular genetic engineering, in the first instance, to provide you with details of this new venture in your field of research, and second to inform you that papers may now be submitted to any member of the Editorial Board for the normal refereeing procedure.

In order to help you should you decide to participate in the launching of this, the first, journal devoted to your subject I enclose a "guide to authors". If you wish to submit a paper for the first issues this should be in the hands of one of the editors by the beginning of September 1976, but of course papers will continue to be accepted for later issues.

If you require further information about GENETIC ENGINEERING please contact any member of the Editorial Board or myself. Telephone numbers and full addresses are provided for your convenience.

With very best wishes.

Yours sincerely,

J. G. Hillier, Ph.D.  
Scientific Editor
